IMPORTANT NOTIFICATION

Applicant

GIULIANI S.P.A.

PCT/EP 03/00519

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

5. 🗆	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).
	(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-7 No: Claims 8 Inventive step (IS) Yes: Claims 1-7 No: Claims 8 Industrial applicability (IA) Yes: Claims 1-8 No: Claims

2. Citations and explanations

see separate sheet

- D1: P.I.HYND, M.J.NANCARROW: 'Inhibition of polyamine synthesis alters hair follicle function and fiber composition' JOURNAL OF INVESTIGATIVE DERMATOLOGY, vol. 106, no. 2, 1996, pages 249-253, XP008006126
- D2: WO 96 23490 A (COSMEDERM TECHNOLOGIES) 8 August 1996 (1996-08-08)
- 1) Document D1 is the closest prior art for claims 1 to 4 stating that spermidine plays a major role in hair growth (see the abstract, last sentence).

However, the person skilled in the art could not expect from this statement that spermidine would also be active against **hair loss**.

Therefore the subject-matter of claims 1 to 4 involves an inventive step.

2) However, lotions or balms containing spermidine are already known from document D2 (see example 1 and claims 2, 46 and 48).

Therefore the subject-matter of claim 8 is not novel (Article 33 (2) PCT).

3) The subject-matter of claims 5 and 6 differs from document D2 in that it contains further additives which were not obvious for the person skilled in the art.

The subject-matter of claim 7 differs from D2 in that it is a formulation for oral use which was not obvious either.

Therefore the subject-matter of claims 5 to 7 also involves an inventive step.
